

## PV CHARGE REGULATORS

APP  
WRM Monitor

Il WRM20 è una soluzione completa per la realizzazione di impianti fotovoltaici ad isola, per alimentare sistemi di segnaletica stradale, sistemi di illuminazione, piccole utenze a bassa tensione e per la ricarica di batterie all'interno dei camper o delle imbarcazioni. Questo regolatore di carica implementa un circuito di ricerca della massima potenza di pannello (MPPT) che, indipendentemente dalla tensione di batteria e dal suo stato di carica, fa sempre lavorare il modulo PV nel suo punto di massima potenza.

Con il regolatore WRM20, si possono installare anche i più economici moduli normalmente impiegati per sistemi connessi a rete, con un numero di celle diverso da 36 o 72. Si possono, inoltre, impiegare i moduli in silicio amorfo normalmente non adatti ai regolatori PWM. Il WRM20 rileva lo stato giorno/notte in base alla tensione del modulo PV, quindi non è necessario collegare ulteriori sensori al regolatore. Un ampio display visualizza lo stato di funzionamento del regolatore, sia attraverso icone semplici ed intuitive, sia visualizzando il valore della corrente di ricarica, la tensione di batteria, l'energia prodotta dal modulo PV, la corrente del carico e l'energia consumata dal carico.

Step down MPPT charge

Maximum PV module power:

- 310 W for 12 V battery
- 620 W for 24 V battery

Integrated blocking diode

For sealed / GEL, flooded lead acid batteries and lithium-ion batteries

Temperature-compensated charge voltage

12 V / 24 V battery auto-detect voltage

18 programs for load management

LCD display user interface

Protections:

- Load-disconnect in case of low battery
- Over-temperature
- Battery polarity inversion
- Output overload protection

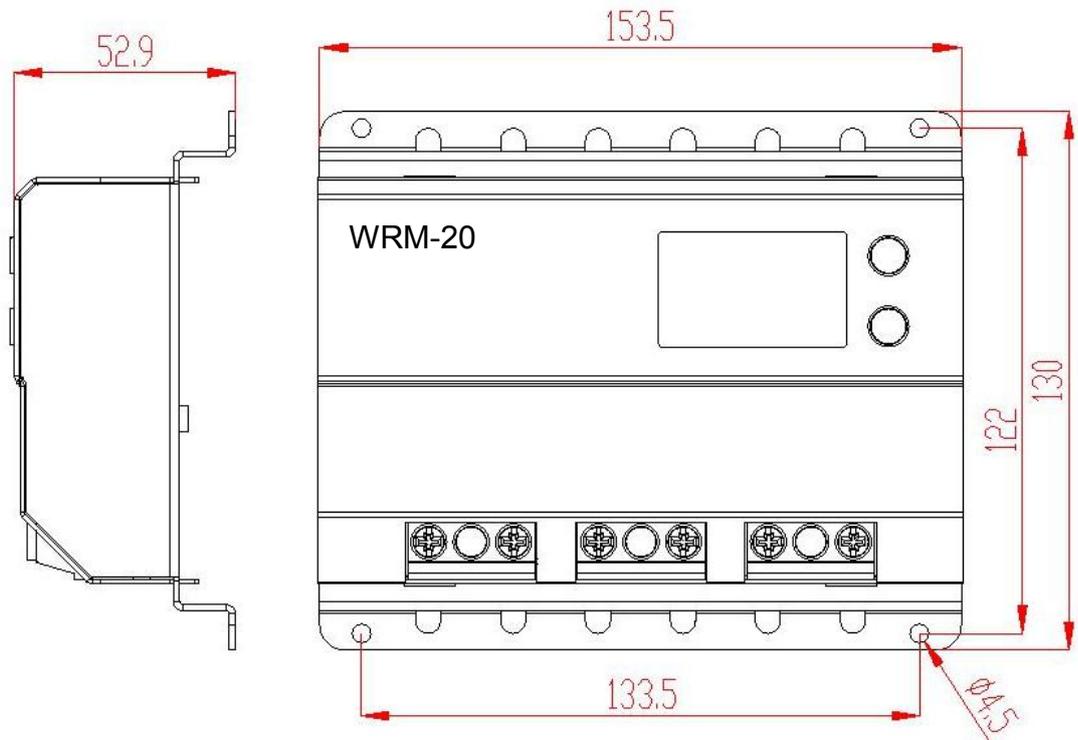

IP20 metal box

*WRM20 is a complete solution for off-grid PV systems to supply power to road signs systems, lighting systems, small low voltage systems and batteries inside caravans. This model of charge regulator has a circuit for the research of the maximum PV module power (MPPT): regardless of the battery voltage and its charge status, WRM20 works with the PV module in its maximum power point, maximizing the energy that comes from the module and then is loaded into the battery.*

*Thanks to the WRM20 controller you can install the cheapest PV modules used in grid connected systems, with a number of cells different from 36 or 72. WRM20 detects the day/night status according to the PV module voltage; therefore it's not necessary to connect further sensors to the regulator. A wide display shows the working status of the regulator not only through simple and intuitive icons but also displaying the values of recharge current, battery voltage, energy production by the PV module, load current and energy consumption by the load.*

## TP660M - 295 / 300 / 305 / 310W

High Efficiency MBB PERC Monocrystalline Solar Module  
60-Cell Series  
Full Black

### KEY FEATURES

#### 12 bus-bar cell technology

Excellent anti-microcracking performance with more balanced interior stress; grid pattern current path, lower Rs

#### Maximize limited space

PERC cell technology, maximum power output 310W

#### Significantly lower the risk of hot spot

Special circuit design with much lower hot spot temperature

#### Excellent low light performance

Advanced surface texturing·Back surface field

#### Excellent Anti-PID performance

2 times of industry standard Anti-PID test by TUV Rheinland

#### Highly reliable due to stringent quality control

In-house testing goes well beyond certification requirements

#### Certified to withstand the most challenging environmental conditions

2400 Pa wind load·5400 Pa snow load·25 mm hail stones at 82 km/h

#### IP68 junction box

The highest waterproof level

### ABOUT TALESUN SOLAR

TALESUN Solar is one of the world's largest integrated clean energy providers with 4 GW cell and 5 GW module production capacity globally. Its standard and high-efficiency product offerings are among the most powerful and cost-effective in the industry. Talesun Solar is committed to provide customers with customized; systematized and trustworthy turnkey solutions. Till now, Talesun Solar has accumulatively shipped more than 10 GW modules globally.

### SYSTEM & PRODUCT CERTIFICATES

- IEC 61215 / IEC 61730 / UL 1703
- ISO 9001 : 2008 Quality Management System
- ISO 14001 : 2004 Environment Mangement System
- OHSAS 18001 : 2007 Occupational Health and Safety Management System

### QUALITY WARRANTY

TALESUN guarantees that defects will not appear in materials and workmanship defined by IEC61215, IEC61730 or UL1703 under normal installation, use and maintenance as specified in Talesun's installation manual for 10 years from the warranty starting date.

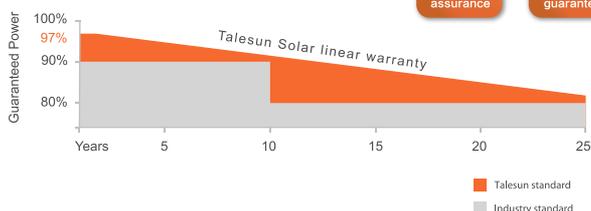

### PERFORMANCE WARRANTY

Monocrystalline Solar Module

10 years  
Quality assurance

25 years  
Power output guarantee
